PROJECTS DURING JOB AND INTERNSHIP

OSINT(open source intelligence tool)

- Working on software project with Implementation of social Media Platform tracking Web application.
- Application record that provides full details of people's Social Media records. Our Client can look at Social Media activities like (Posts, Work History, Name, Location, and Interests) with respect to concerning the platform and then its record keep in the software. Therefore, the user can see each Record.
- This Software provide the Report for each Target (People).
- Artificial Intelligence is Applied here to check object detection and sentiments to provide a deep view of a person who posts on any social media.
- Application is so usefull for Law and agencies.

Calculator

- Designed and developed using Vanilla JavaScript, HTML and CSS

Todo List

- Developed a Todo list for daily use. This interface allows us to add, edit, remove and read To-dos .
- Key technologies used: React JS, CSS, JavaScript

Tickets Dash Board

- Works like JIRA dashboard.
- In this interface, we can create tickets through popup, update tickets, drag and drops tickets in different columns like Backlog, Todo, On Going and Done To-dos.
- Key Technologies used: React JS, JavaScript, Scss, React Hooks

Football Tracker App

- Maintain the record of football matches in the form of Tickets
- This app contain three filters i.e. Show all matches, Today matches and favorite
- In this interface, i used Api for getting data
